MEMORIAL UNIVERSITY OF NEWFOUNDLAND
Engineering Management

The Faculty of Engineering and Applied Science, Memorial University of Newfoundland, invites applications for a tenure-track appointment (subject to budgetary approval) in the field of Engineering Management commencing October 1, 2008. Candidates should have an undergraduate engineering degree, as well as an earned graduate degree in engineering management, business administration or a cognate area. Candidates are also expected to hold an earned Ph.D. and to have a demonstrated research record. The appointment will be at the assistant or associate professor level and salary will be commensurate with the successful applicant's qualifications.

The successful candidate will be expected to take a lead role in the development and delivery of a new master's program in engineering management, in collaboration with the Faculty of Business Administration and Distance Education and Learning Technology, as well as in new program offerings at the undergraduate level in the area of technological entrepreneurship. The successful candidate will be expected to participate in the academic programs of the Faculty, including teaching undergraduate and graduate courses, developing and teaching distance courses, developing undergraduate laboratories, supervising graduate students, and other educational, scholarly and professional activities. As well, it is desirable that the candidate be able to develop appropriate research collaborations with industry, government institutions, and other university researchers. The successful candidate will be expected to register as a professional engineer in Newfoundland and Labrador.

The Faculty of Engineering and Applied Science offers accredited undergraduate programs in Civil Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, and Ocean and Naval Architectural Engineering following a fully integrated cooperative education model. Offshore Oil and Gas Engineering Options are offered as a part of every undergraduate engineering program. The Faculty is developing a new undergraduate program in process engineering. Thesis-based and course-based master's programs, as well as doctoral programs are offered in the various engineering disciplines. For more information on the Faculty of Engineering and Applied Science, visit www.engr.mun.ca.

Memorial University is the largest university in Atlantic Canada. As the province's only university, Memorial plays an integral role in the educational and cultural life of Newfoundland and Labrador. Offering diverse undergraduate and graduate programs to almost 18,000 students, Memorial provides a distinctive and stimulating environment for learning in St. John's, a very safe, friendly city with great historic charm, a vibrant cultural life, and easy access to a wide range of outdoor activities. For further information about Memorial, please view the website at www.mun.ca.

Applicants should send curriculum vitae, the names of three references and a one-page statement of teaching and research interests. Copies of three relevant technical publications should also be included. Forward to:
