Radiowave Oceanography and Other Workshop Contributions

This is an international 4-day workshop of 35 to 40 HF radar experts and users (mainly physicists and engineers) where the latest models and applications of the science and technology associated with the remote sensing of the oceans via HF radar, as well as required research directions, are discussed. While it is not a ‘refereed’ workshop, it is probably the single most important venue for the dissemination of research expertise in this field and input is invited from a small group of experts. Our group at Memorial University is among a minority of participants who are deeply involved with the basic and applied science underlying the technology.

**Other Conference/Workshop Contributions/Presentations**

(All, but two of the following were presentations at the local yearly *IEEE* Newfoundland Electrical and Computer Engineering Conference (*NECEC*) and appear in the Proceedings.)
