

International Electric Machines and Drives Conference (IEMDC 2011) at Niagara Falls

“Modern Machines and Drive Technology in 2nd Decade of the 21st Century”

Niagara Falls, 15 –18 May 2011
Final Technical Program is Updated

Oral and Poster Guidelines are Updated

The IEEE International Electric Machines and Drives Conference (IEMDC) provides an international forum for sharing experience, new ideas, and developments in design, operation, analysis, and practical application of electrical machines, generation of electric energy and drive systems and their components. IEMDC is a venue for users,

designers and manufacturers, and analysts of electric machines and drives and their related power electronics and controls. The conference is jointly sponsored by the four IEEE Societies, namely, IEEE Power and Energy, Power Electronics, Industrial Electronics and Industry Applications. In addition to the subjects identified above, the conference will have papers and plenary presentations by world recognized experts to highlight various aspects of electric machines and drives such as general industry and automotive applications, renewable and new energy applications. Of interest are topics related to permanent magnet generators and motor drive systems, fault tolerant and bearingless operation and maintainability, diagnostics and prognostics of electric machines and systems, and intelligent control of electric motor drives and systems. Also of interest are papers in areas including novel designs and applications of electric machines and drives in utility, hybrid electric vehicles, naval and aircraft power systems. **Three hundred** papers are already uploaded from 900 authors. These papers will be presented in oral and poster sessions over the busy days of conference. There will also be exhibitions and invited keynote lectures. In addition to the participating authors the conference will be attended by delegates from industry, government and academia.

Detail guidelines for registration as conference delegates are updated in page 7.
