A Problem

- Assume: Every card has a letter on one side and an integer on the other.

- Rule to check: *Only vowel cards may have an odd number on the other side..*

- Four cards are on the table

The visible sides of the cards say:
- E

- 4

- 9

- K

Which cards must be flipped to verify the rule is followed?

A Problem

- Assume: Every card has an age on one side and a drink on the other.

- Rule to check: *Only persons 19 and over may drink alcohol*

- Four cards are on the table

The visible sides of the cards say:

- (Andy) Age 21

- (Barb) Pepsi

- (Chris) Beer

- (Dan) Age 18

Whose cards must be flipped to verify the rule is followed?
