

Assessment of Team Contributions

Software Engineering 7893

Dr. D. K. Peters

Fall 2009

Name: _____

Student #: _____

Team Name: _____

This form is entirely confidential when completed.

In assigning marks for the project part of the course to individual students, I will be taking into account each team member's opinion of the relative contributions of the members of the team. For that purpose I would ask you to fill out the following questionnaire as honestly as you can. You should include yourself in the list of team members, but should be aware that inflating your own contribution will not improve your mark.

Team Member	Relative contribution %
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
Sum	100

Below, and on the back of the page if necessary, please briefly justify the allocation you made above and feel free to make any other comments on team-work within your team.
