

Guidance for Writing Good Article or Report

- All diagram x and y able should be readable with theory font size. It would help if you had increased all diagram and results from x and y scale to 38 to 42 in MS Visio.
- Keep the only reference from 2019 to 2020 might be one or two old references and all reference in IEEE transactions and conference are recommended.
- Cross-check all figure number, and there is an error and noticeable easily.
- Keep article is 14 pages which journal planned to submit? – only 8 pages are free for publication. Some IEEE journal allows a maximum of 12 pages (IEEE Systems Journal) and additional each page after 8 will be 150 USD plus VAT.
- Again, I am repeating to ensure quality in presentation.
- et al. should be avoided in the paper reference put all authors name
- Yellow color should be avoided in the diagrams and use all figures with high quality and resolution with 300 dpi
- All equation should be editable and use MS word equation editor tool available in 2016 or higher version. Math type is also highly recommended.
- Subscript and superscript should be handled correctly in the paper.
- Note theory and figure, equation all should be aligned in the same style for either italic or regular times new roman font.
- Label inside the figure should be readable as the same font of theory. Usually in vision fix, 38 font and when saved as .tiff copy and paste will be useful in word and all readable.
- In theory, avoid citation paper authors name put the only number [1] etc.....

Guidance for Writing Good Article or Report

- Carefully have double-blind to avoid spelling errors.
- Use standard professional tools Microsoft Visio or edraw for making diagrams, circuits, figures etc.
- Matlab program to plot high quality results
- Above all Microsoft visio files my example to make quality results
- et al. should be avoided in the paper reference put all authors name
- **Yellow colour should be avoided** in the diagrams and use all figures with high quality and resolution with 300 dpi
- All equation should be editable and use ms word equation editor tool available in 2016 or higher version
- Subscript and superscript should be handled correctly in the paper.
- Note theory and figure, equation all should be aligned in the same style for either italic or regular times new roman font.
- **Label inside the figure should be readable as the same font of theory. Usually in visio fix, 22 font and when saved as .tiff copy and paste will be useful in word and all readable.**
- In theory, avoid citation paper authors name put the only number [1] etc.....
- Carefully have double-blind to avoid spelling errors.
- Use standard professional tools **Microsoft Visio or edraw for making diagrams**, circuits, figures etc.
