Mission Statement

To provide our clients with quality design and consultation services in an efficient manner. We work with diligently and efficiently in order to meet our clients specific needs. Safety, sustainability, and integrity are what we guarantee with our services.

Company Profile

KCC Engineering is a team of three senior civil engineering students from Memorial University. Our team has gathered experience in many diverse fields including structural steel remediation, hydrologic analysis and design, concrete batch plant operation, bridge construction and maintenance as well as project management .

The KCC Team

Steven Kent

Steven is a senior civil engineering student at Memorial University. Most of Steven's work experience is split between two fields. The first being municipal infrastructure planning, design, and remediation. Steven's second field of experience is structural steel remediation in heavy industry. He also has experience in material quality control and site planning.

Steven's field of interest are structural design, and municipal development.

Michael Chafe

Mike is a well rounded senior civil engineering student. His experience includes but is not limited to bridge construction, concrete operations, earthworks operations as well as structural steel. Even though he has earned most of his experience in the field, Mike believes he can provide a surplus of knowledge that will be an asset in the engineering design process.

Donald Campbell

Donald Campbell is a senior civil engineering student at Memorial University. He has work experience in bridge inspection and maintenance and project management including a work term with the inspection and maintenance group on the Confederation Bridge and a work term with major project management with Syncrude Canada.

His professional interests include structural engineering and project management.
